Personal Cloud

BeeStation Plus

Create your cloud for demanding workflows

With 8TB[1] of built-in storage, BeeStation Plus is designed for data-intensive professionals, households, and small studios seeking a cloud alternative. It efficiently manages large volumes of data, whether transferring content-heavy files on your desktop, backing up thousands of mobile photos, or organizing files via the web. Experience high-performance, cloud-like workflows while keeping full privacy and control.

Highlights

- Set up a private cloud in minutes and get right into data managing works
- Bring your data from computers, tablets, phones, external drives, and cloud services to one place and access them anywhere, anytime
- Up to 2.6x the original speed for mobile photo backup, 3.8x for web uploads, and 4.8x for desktop sync compared to BeeStation 4TB[2]
- Back up phone photos and let local AI find who or what you're looking for
- Integrates with Plex Media Server and supports hardware-accelerated streaming[6]
- Share storage with family or team members, giving each person their own cloud space
- All data is protected by default with snapshot-powered restore points, safeguarding against ransomware
- Get 3 months free of BeeProtect, an affordable, privacy-first cloud backup, to secure your data from disasters or theft
- 3-year warranty included

Set up in minutes – Dive right into meaningful work

Scan a QR code, plug in the power and Ethernet cables, and press a button to confirm — that's all you need to do after unboxing. After that, you're all set to start transferring files or photos to your private cloud storage, and focus on what truly matters.

Store everything here. Access anywhere.

With 8 TB[1] of storage space, you can store all your work and personal files here. Once they're on BeeStation, you can reach them from any web browser, as well as from the desktop or mobile apps. Also, since you can use your Google Account, Apple ID, or Synology Account to sign in, you won't have to remember any extra logins.

Accelerated performance for single and multi-user scenarios

Upload your files via desktop or web at optimal speed with no slowdowns. Even with multiple users transferring or accessing files simultaneously, everyone can enjoy uninterrupted workflow. Once uploaded to BeeStation, your files are easily accessible and shareable to the public, wherever you are. For added security, protect shared links with passwords or expiration dates, ensuring that only the right people can access your files.

Independent storage space for each user

Share the storage space with up to 8 users. Send an invitation link to anyone to give them their very own cloud space for managing their works, completely separate from others. This process is even easier for them; all they have to do is sign in with their Google, Apple account, or Synology Account.

Never max out phone storage again

Backing up photos to BeeStation is as simple as opening the app. Just got back home from a trip? Turn on Focus Backup, and let thousands of photos upload overnight while you rest. Once backed up, your photos will be securely stored and accessible wherever you go.

Gather your scattered photos under one roof

Managing photos across cloud storage and external drives can be a hassle. With BeeStation, you can transfer images from Google Photos, USB drives, or local folders on your computer to manage them in one place. You can also connect with your iCloud Photos for automatic downloads, ensuring a local backup is available to protect against accidental deletions.

Photo organizer driven by local AI

Accelerated by its built-in GPU, BeeStation Plus's AI makes it easier than ever to find the people, pets, or things you're looking for — without ever sending your data to the cloud. You can also explore a world map to rediscover photos from the places you've been. With these features and more, BeeStation Plus takes the work out of photo organization, all while keeping your information secure and private.

Keep your cloud and USB files in one place

Got files all over the place? BeeStation can sync files from Google Drive, OneDrive, Dropbox, including their collaborative workspace[3], as well as back up any connected external and flash drives. That way, if you ever lose access to a cloud account or can't find a physical external drive, you can rest easy knowing

you've got a backup on BeeStation.

Multimedia streaming with Plex Media Server

BeeStation Plus features Plex Media Server, allowing you to create a personal media library. Access and stream your video collection to TV, computer, phone, or tablet anytime, from anywhere. Supporting hardware-accelerated streaming on Plex, BeeStation Plus delivers smoother video playback.[6]
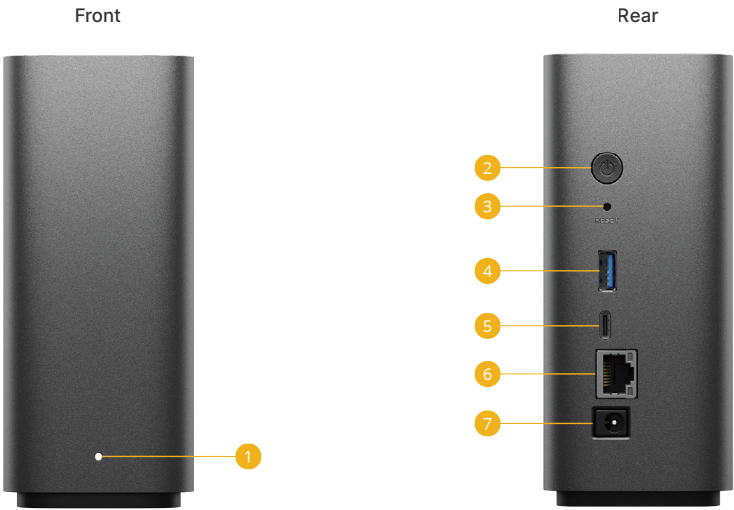

Robust data protection built-in

BeeStation maintains internal restore points powered by snapshot technology, allowing you to roll back all data to a previous state in minutes. For added protection against disasters, theft, or hardware failures, you can back up BeeStation to BeeProtect, C2 Storage, an external drive, or a Synology NAS.

BeeProtect – Affordable, set-and-forget cloud backup

Every BeeStation includes a complimentary 3-month BeeProtect subscription, a privacy-first cloud backup service featuring client-side AES-256 encryption. This ensures all your data is encrypted with your password before being uploaded. With one subscription covering your entire BeeStation, you won't need to worry about upgrading for additional backup storage as your data grows. Learn more at https://sy.to/BeeProtect.

Technical Specifications

General Specifications

Hardware	
Capacity	8 TB[1]
Processor	Intel Celeron J4125
Memory	4 GB DDR4
LAN port	1 × 1GbE RJ-45
External ports	• 1 x USB-A 3.2 Gen 1 port • 1 x USB-C 3.2 Gen 1 port
Color	Graphite Silver
Dimensions (H×W×D)	148.0 × 62.6 × 196.3mm

Weight	1.2 kg
Power Supply Unit / Adapter	36 W
AC Input Power Voltage	100V to 240V AC
Power Frequency	50/60 Hz, Single Phase
Power Consumption	• 14.75 W (Access) • 2.83 W (HDD Hibernation)
British Thermal Unit	• 50.30 BTU/hr (Access) • 9.65 BTU/hr (HDD Hibernation)
Operating environment	• Temperature: 0°C to 35°C (32°F to 95°F) • Relative humidity: 8% to 80% RH
Storage environment	• Temperature: -20°C to 60°C (-5°F to 140°F) • Relative humidity: 5% to 95% RH
Software	
Supported browsers	Google Chrome®, Firefox®, Microsoft Edge®, Safari® 14 and above
BeeStation for desktop	• Windows 10 2004 (19041) and above, Windows 11[4] • macOS® 12.3 or above
BeePhotos & BeeFiles mobile apps	• iOS 16 or above • Android 8 or above (BeeFiles) • Android 10 or above (BeePhotos)
Interface languages	English, Deutsch, Français, Italiano, Español, Nederlands, Русский, Polski, Čeština, 日本語, 한국어, 繁體中文, 简体中文

Environment and Packaging

Certification	FCC, CE, BSMI, RCM, EAC, UKCA, KC, VCCI, CCC, BIS
Environmental safety	RoHS
Package contents	• 1 x BeeStation Plus main unit • 1 × AC power adapter • 1 × RJ-45 Ethernet cable • 1 × Quick start guide
Warranty	3 years[5]

Note: Specifications are subject to change without notice. Please refer to the model's specifications page for the most up-to-date information.

1. 1 TB = 1 trillion bytes. Actual usable capacity is approximately 6.98 TB.

2. These figures are based on Synology's internal testing and may vary depending on your environment. Mobile photo backup was tested with an iPhone 15 Pro, while web uploads and desktop sync were tested using an Intel i5 Windows laptop and an M2 MacBook Air simultaneously. Transfers are considered "complete" once they have been indexed and appear in the web interface.

3. BeeStation also supports sync to Google Shared Drive, Dropbox Team Space, and Microsoft OneDrive for Business.

4. Excluding Windows on ARM and Windows Server editions.

5. The warranty period starts from the purchase date as stated on your purchase receipt.

6. Additional purchase of Plex Pass is required for hardware-accelerated streaming and remote access.
